

**Explicit Curriculum Assessment Data Collected during the Academic Years (2020-2022)
Lesley University MSW Program**

The tables below are provided by the Council on Social Work Education (CSWE) to document the most recent summary data and outcomes for the assessment of each of the nine competencies. In this initial reporting of assessment data, the MSW program currently meets the benchmark for all nine competencies. We are a new program and this data only represents a small cohort. The non-skills-based and skills-based dimensions are based on an n = 6 which represents our current number of graduates. We will monitor the percentages for benchmark attainment on each competency as the number of our students increase. If the numbers remain at this level, we will re-think our benchmark percentages and reevaluate the assignments and rubrics designed for assessment.
